

## TAMALPAIS UNION HIGH SCHOOL DISTRICT MODERNIZATION HIGHLIGHTS AND UPDATES

MAY 2009

---

Many of the projects outlined in the 2006 Bond have been designed and approved by the Division of the State Architect (DSA) review process. Some have been completed or are nearing completion while others are being prepared for ground breaking this summer. Following are some highlights and a summary of bond progress.

---

### **Sir Francis Drake High School**

#### **Six-Plex Classroom Building**

Work is now underway on six new classrooms for Drake High School. The building will be a two-storey structure with an elevator to provide access to the second floor. The new structure will be built at the location between the boy's and girl's locker rooms where the old pools were previously located.

Site grading has been performed and the placement of the concrete foundation is scheduled to occur in early May. Work on the project will be ongoing until the fall of 2009.

*Ready to Place Concrete for Foundation*

---

### **Redwood High School**

#### **New Solar Shade Structure**

A new covered work area at Redwood High School will simultaneously provide useful shelter for large projects while converting solar energy into electricity. Now under construction, the shade structure adjacent to the woodshop will have a solar array installed on the roof. Power generated from the panels will offset some of the electricity used at Redwood High.

In addition, the electricity generated by the solar panels will be displayed in real time by metering devices. This system, and its informative displays will provide an opportunity for Redwood students to learn about solar-generated electricity in a hands-on environment.

*Shade Structure is Functional and Green*

MAY 2009

## Tamalpais High School

### New Pool and Weight Room

Work continues on the new swimming pool and weight room. The rough framing of the weight room is now complete. Building close-in will be the next project milestone. The new pool walls have been formed and work is now focused on framing the mechanical room and installing pool plumbing.

*New Pool Has Walls; Mechanical Room Next*

### Field House Replacement

Framing of the new field house is complete and rough plumbing work is now underway. An aggressive schedule has completion targeted for late summer.

## Carlisle High School

### Classroom Addition

A much needed addition to the Carlisle building is now under construction. The addition will add 2,031 square feet to the existing building. The project will provide two new adult education classrooms, two restrooms, and related curbs, ramps, and walkways for ADA compliant access.

*Foundation Installed*

The contractor for the addition is NorCal Construction of Vacaville. Currently, the project is on track for completion in the Fall of 2009.

## District Wide

*Redhill Field is Now Open for Use*

### Modernization team and contacts
