

How does the structure of a water molecule help it function?

<https://www.theguardian.com/science/video/2014/nov/07/water-bubble-space-science-video>

As you watch, think about the structure of a water molecule and how that would help it function like this.

Model it

On your whiteboards, draw a water droplet in space. Then ZOOM IN on a portion of the droplet to show how your group thinks the molecules are interacting.
