

CAASPP System Assessments 2019
Smarter Balanced Summative Assessments and California Science Test
Parent and Guardian Notification Letter

March 13, 2019

Dear Parent/Guardian:

California’s academic standards—the things we want students to know and be able to do—are designed so students graduate ready for college and a career. One way we measure their progress is through the California Assessment of Student Performance and Progress (CAASPP) assessments. Students across California in grades 3–8 and high school take these assessments each spring. These tests were created specifically to gauge each student’s performance in English language arts/literacy (ELA), mathematics, and science. These tests measure the skills called for by the academic standards, including the ability to write clearly, think critically, and solve problems.

Because CAASPP tests are given statewide, they provide an opportunity to measure the skills of all students against the same academic standards. Given online, the tests are computer-adaptive, allowing more precise measurement of individual skills.

This year, your child will take the following tests, and participation is required:

Smarter Balanced Summative Assessment (ELA)	Smarter Balanced Assessment (Mathematics)	California Science Test
All 11th graders – April 1	All 11th graders – April 2	All 12th graders – In Science Class sometime between April & June

On the testing dates of April 1 & 2, the school will be on a special bell schedule. Juniors will be testing in the mornings and then will attend their regular classes after lunch. Seniors will not be required to come on campus until after lunch those days. Please click [HERE](#) for the bell schedule that week.

Smarter Balanced Assessments

The Smarter Balanced ELA and mathematics tests reflect California’s rigorous academic standards, the Common Core, and allow students to demonstrate analytical writing and critical thinking skills as well as their knowledge of facts.

To learn more about these tests, please visit CDE's Test Score Guide Web site at <http://www.testscoreguide.org/ca>, which provides informative guides and test score descriptions as well as sample test items at different levels of difficulty.

Another great resource are the Practice and Training Tests, which can be found on the CDE's Smarter Balanced Practice and Training Tests Web page at <http://www.cde.ca.gov/ta/tg/sa/practicetest.asp>. Here, parents can experience the kinds of questions that students will encounter on the tests.

California Science Test— Seniors

California's new state standards for science, the Next Generation Science Standards, call for students to think and work like scientists and engineers—asking questions and learning through hands-on investigation and discovery. Working with science teachers, California developed a new assessment that emphasizes scientific thinking and reasoning. This year your child will participate in the first year of their operational assessment, meaning scores count and will be reported to families, schools, and the state. For additional information about the new science tests and sample questions, please visit the CDE's CAASPP Science Assessment Web page at <http://www.cde.ca.gov/ta/tg/ca/caasppscience.asp>.

Federal regulations require schools to report 95% participation rates on state assessments, so your support in encouraging all students to attend, and put forth best effort is much appreciated. For more information, please see the Frequently Asked Questions (FAQ) [HERE](#). If you have any additional questions regarding your child's participation in statewide assessments, please contact Assistant Principal Chad Stuart at cstuart@tamdistrict.org or (415) 458-3414.

Sincerely,

Liz Seabury
Principal, Sir Francis Drake High School
