

Converse of Parallelogram Theorems	
If both pairs of opposite sides of a quadrilateral are congruent, then the quadrilateral is a parallelogram.	
If both pairs of opposite angles of a quadrilateral are congruent, then the quadrilateral is a parallelogram.	
If one pair of opposite sides of a quadrilateral are congruent and parallel, then the quadrilateral is a parallelogram.	
If the diagonals of a quadrilateral bisect each other, then the quadrilateral is a parallelogram.	

Examples: Determine if the quadrilateral must be a parallelogram. Describe how you determined your answer.

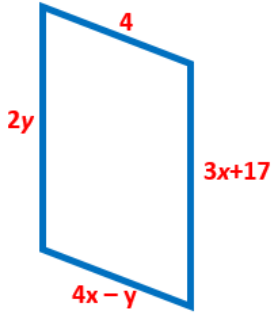

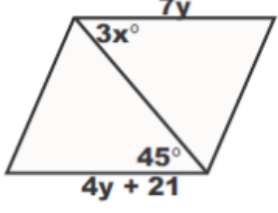

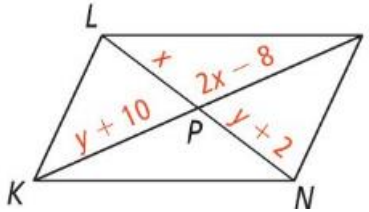

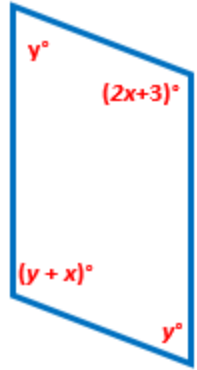

<p>1. </p>	<p>2. </p>	<p>3. Draw a segment from <math>P</math> that is parallel to <math>\overline{QR}</math> so that <math>\square PQRS</math> is formed.</p> <div style="text-align: center;"> </div>

Algebra Review:

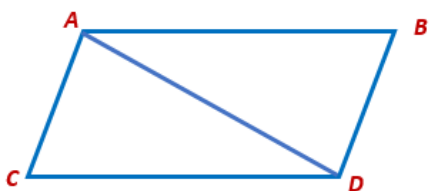

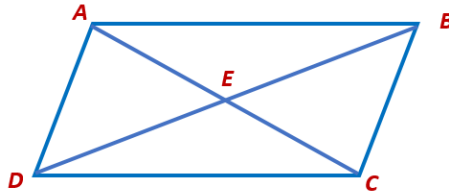

<p>Rules:</p> $x^a x^b = x^{a+b}$ $(x^a)^b = x^{ab}$	<p>4. What does <math>x^5</math> mean?</p> <div style="border: 1px solid blue; border-radius: 50%; padding: 10px; display: inline-block;">             _____ factors of _____              _____ • _____ • _____ • _____ • _____           </div>	<p>5. Write out all the factors of <math>x^3 x^7</math></p> <p>_____ = _____</p>
		<p>6. Write out all the factors of <math>(x^2)^4</math></p> <p>_____ = _____ = _____</p>
<p>7. <math>(3x^4)(4x^5)</math></p>	<p>8. <math>(2x^2 y^4)^3</math></p>	<p>9. <math>(4x^3 y^4)(7x^6 y)</math></p>
<p>10. <math>2x^4 \cdot 6x^6</math></p>	<p>11. <math>(4x^3 y)^2</math></p>	<p>12. <math>(3x^5 y^2)(7xy^5)</math></p>

HW #3 - Use separate paper for most problems.

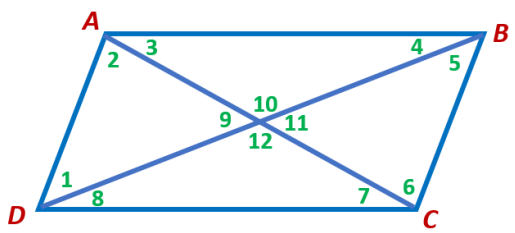

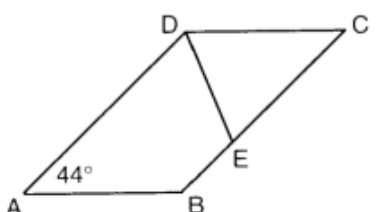

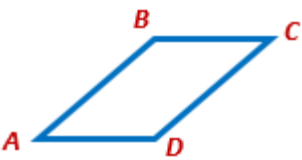

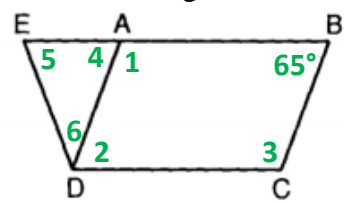

Find the value of each variable that will make the quadrilateral a parallelogram. You may need to solve a system of equations.

<p>1.</p> 	<p>2.</p> 	<p>3.</p>  <div style="border: 1px solid black; padding: 5px; margin-top: 10px; width: fit-content;"> <p>*try solving this one by substitution instead of elimination.</p> </div>	<p>4.</p> 
---	---	---	---

5. Parallelograms and Congruent Triangles:

<p>a) Given that <math>ABDC</math> is a parallelogram, show that's <math>\triangle ABD \cong \triangle DCA</math>. Complete a proof or describe how you know it's true.</p> 	<p>b) Given that <math>ABDC</math> is a parallelogram, show that <math>\triangle AEB \cong \triangle CED</math>. Complete a proof or describe how you know it's true.</p>
