

Geometry Opener Lesson #7

Name: _____

<p>1. Mark the diagram: \overline{FA} bisects $\angle IFT$</p>  <p>so _____ \cong _____</p>	<p>2. Mark the diagram: \overline{FA} bisects $\angle IAT$</p>  <p>so _____ \cong _____</p>	<p>3. Mark the diagram: L is the midpoint of \overline{UF}</p>  <p>so _____ \cong _____</p>
<p>4) $\triangle PIA \cong \triangle ONA$. Mark all the corresponding parts congruent. Describe how you know that $\angle 1 \cong \angle 2$.</p> 	<p>5) Solve the system:</p> $\begin{cases} 3x + 5y = 11 \\ 4x + 2y = 24 \end{cases}$
