1. **Corresponding Angle Technique:**
   a) Use “\(\cong\) corresponding \(L\)'s \(\iff\) \(\parallel\) lines” and how to copy an angle to construct a line through point \(C\) parallel to line \(AT\).

   b) Write out detailed directions describing this method.

2. **Alternate Interior Angle Way:**
   a) Use “\(\cong\) A.I.A. \(\iff\) \(\parallel\) lines” and how to copy an angle to construct a line through point \(P\) parallel to line \(AW\).

   b) Write out detailed directions describing this method.
